Numbers are limited, please contact us soon to avoid disappointment

**January 2018**  
 January is normally the coldest and quietest month. The low sun can exert little heat, whilst the air is often of frigid Arctic or Siberian origin. For England, the coldest months ever have all been January's and the usual coldest night -27.2°C, was at Gaehar, Aberdeenshire 10/8/11/1992. Storminess peaks 8"-16" and record low pressure (925.6mb) occurred 26/01/1884.

"Dr. Wild delivered a thorough forensic report well within agreed timescales. This report brought about a change in tactics from the other side so that on appeal the same issues regarding the weather were not pursued".

Gaynor Sutton  
 Nicholas Sutton Solicitors

"Dr Richard Wild can be relied on for a solid report for our defence cases defining the position at a particular time and place. The clarity and structure of the WeatherNet report allows me to make informed recommendations to clients".

Tara McSorley  
 BLM

"I have always found Dr Wild's reports to be comprehensive, intelligible and readily accepted by the Courts. His reports have been more than decisive on more than one occasion, which, in fraud litigation, is relatively rare. I would recommend WeatherNet without hesitation".

Sunil Nannar  
 DWF LLP
