CONTACT DETAILS	Atul.mehta1@outlook.com Dramehta1@yahoo.co.uk TEL : 07803 789585 Post : As above
Date of appointment:	1 st January 2019

Former Role:

Consultant Physician and Haematologist to the Royal Free Hospital November 1986-January 2019.

Professor of Haematology, University College London (promoted August 2010)

Director of the Myeloma Service at the Royal Free Hospital 1986-2017

Consultant Haematologist at University College Hospital 2015-2019.

Founder and Clinical Director of the Royal Free Lysosomal Storage Disorders Unit 1996-2019

Senior Examiner in Haematology at the Royal College of Pathologists – 1995-

Consultant in Charge – Regional Haematology Diagnostic laboratory from 1986-2002; Royal Free Blood Transfusion laboratory from 1986-1997.

Current role:

Professor Mehta retired from the NHS in January 2019 at the age of 65 years. He continues in private practice in central London, principally in general haematology and coagulation. He also does medico-legal work, consultancy (principally in gene therapy), research and charitable work.

Interests and Expertise:

Haematology: General Clinical and Laboratory Haematology, Transfusion Medicine, metabolic medicine and coagulation. His clinical interests span both malignant and non-malignant haematology and include the treatment of acute and chronic leukaemias, myeloma, lymphoma and non malignant conditions. He continues in private practice in general haematology and coagulation. He has published more than 350 peer reviewed articles in research journals, 40 chapters and 5 books. He has co-authored standard undergraduate and post-graduate textbooks in (3 in Haematology, and 2 in Lysosomal Storage Diseases). He is an internationally acknowledged expert in adult Lysosomal Storage diseases, Chairing and lecturing at International and National congresses, giving 15-20 presentations per year up to the year 2020. He has presented evidence before the US FDA, UK MHRA/NICE, and the European EMA.

Medico-Legal: He has been doing medico-legal work for over 20 years, providing reports for Claimants and Defendants (Split is 70:30) in addition to commissioned work and court appearances. He works closely with an associate (a consultant haematologist at Imperial) who is in active NHS clinical practice.

He undertakes reports where he has appropriate experience – general haematology, including coagulation and hospital transfusion; malignant and non-malignant haematology. He makes 1-2 court appearances yearly and produces more than 200 reports annually including 3-5 joint reports. He has attended accredited courses eg the Inspire MedLaw course in Oxford, March 2020. He completed the InspireMedLaw report writing course in June 2021 and the BMA Courtroom skills course and IDF medico=legal courses in 2023.

He works closely with **Dr George Adams**, Consultant Haematologist at London North West University Healthcare NHS Trust and Lecturer in Haematology at Imperial College London. He is a fully accredited specialist and a Bond Solon trained expert witness. His qualifications are MSci (Chemistry), 2006 (Imperial), MBChB (2011, University of Bristol), MRCP (UK) – 2013, MSc Epidemiology/Biostatistics (2018, Imperial), PhD (Computational/Statistical Biology, 2022, Imperial College London), MSc Computer Science (2023, University of Bath) and FRCPath (Haematology, 2023). Clinically, he focusses on coagulation and thrombosis, obstetric haematology, and myeloproliferative disorders. He maintains an independent medico-

legal practice, providing CPR Part 35-compliant reports for both Claimants and Defendants in matters of clinical negligence, personal injury, and coronial investigations. He is Bond Solon trained and offers specialist expertise in thrombosis, anticoagulation, general haematology and malignant disease (including both lymphoma and leukaemia).
