- Honorary Consultant Urologist – Royal Free Hospital (Urothelial Cancer)
- MD – Woolaston House Private Medical Chambers
- Chairman of the Urology Tumour Board – NLCN
- Consultant Urological Surgeon – Wellington Hospital
- Consultant Urological Surgeon – Highgate Hospital

AREA OF EXPERTISE:

1. **Scroto-genital Day Surgery** - I am an internationally recognised authority in urological day surgery with emphasis on minimally invasive methods. Most scroto-genital surgery can be performed as a day case (circumcision, vasectomy, vasectomy reversal, epididymal cysts, varicocoeles, and testicle removal).
2. **Management of Neuro Urology – Cauda Equina** - For 25 years I was responsible for the urological management of the complications associated with our Spinal Unit and Neurological Department at The Whittington NHS Trust. I have extensive experience in the diagnosis, treatment and evaluation of Cauda Equina Syndromes and research published work in neurourology. I have reported on more than 200 Cauda Equina cases.
3. **Gynaecological Injury Urinary Tract** - I have 25 years' experience dealing with the major surgical complications following gynaecological surgery (perforated bladder, fistulae, ureteric damage, bladder distention) I was lead clinician in this respect serving a very busy Obs and Gynae Unit.
4. **Bladder Overdistention Injuries** resulting from delayed management of urinary retention.
5. **Renal Stones** - I have been a supra-regional urological specialist for both open and endoscopic renal (kidney) surgery for many years, with a particular interest in stone disease. I have an international reputation in this area.
6. **Prostate Conditions** - I am completely conversant with the operative management (TUR) of benign prostate disease. I have always looked after prostate cancer patients throughout my career. As Chairman of NLCN (urology) I was responsible for regional prostate cancer outcomes and management in a supervisory capacity. I do not perform laparoscopic or robotic prostatectomies but can report on indications and outcomes. At the Whittington Hospital I was lead for pelvic cancer surgery (bladder); my colleague surgically managed prostate cancer operation.
7. **Pain Syndromes** - In the last 10 years I have become interested in Urological Pain Syndromes (painful bladder syndrome, urethral syndrome, prostatitis, pelvic pain of a urological origin, chronic testicular pain). I have developed a number of novel treatments for these difficult conditions with a good degree of success.
8. **Urinary Infections/Sepsis** and their treatment.
9. **Malignant Disease Kidney and Bladder and Prostate** - I am a member of the British Association of Urological Surgeons, Uro-oncology Section, and have been Chairman of North London Cancer Network Urology Committee, which was responsible for the governance and outcome of all tumour surgery in the region. I have extensive experience of both renal and bladder cancer surgery, and worked for a number of years at the Regional Cancer Centre at University College Hospital, as well as the Royal Free Hospital while at the same time being the lead clinician at The Whittington Hospital.

My clinical work is supported by a considerable body of research which has resulted in more than 147 publications 2 textbooks and 27 book chapters and more than 270 national and international presentations.

Following more than 25 years as an NHS consultant I am now Senior Consultant Surgeon at St John and St Elizabeth where I see patients privately for clinical and Medico-Legal issues. I continue to lecture to doctors and lawyers. I am appraised annually by the IDF and I am validated by the GMC for clinical practice. I do not report on laparoscopic or robotic surgery. My clinical and Medico-Legal practice are fully insured.

MEDICO-LEGAL

I have specialist medicolegal knowledge in cauda equina symptomatology of bladders and sexual dysfunction, gynaecological injury to the urinary tract, bladder overdistention, stone disease, cauda equina and cancer cases. I am also able to report on general urology: torsion, vasectomy, prostate surgery, and pelvic fractures. I am happy to consider the merits of a case based upon a summary letter and provide full costings in advance of work being undertaken.

I am able to draw upon 30 years' medicolegal practice. I have produced more than two thousand medical negligence reports and complete 100-110 new cases a year, of which 20% are defendant, 70% are claimant and 10% are single joint expert.

I take time to enhance my understanding of medicolegal best practice, having attended courses on preparation of medical legal reports, courses on court presentation and many meetings on Medico-Legal issues. Additionally, I have participated in the Inner Temple Further Education Day for Barristers (Advocacy training for Barristers) as well as the Sargent Chambers Neurosurgical Update Meeting (Oxford). I was medicolegal advisor to the London Clinic MDT.

I have lectured on preparation of medicolegal reports and legal issues (RSM, Holyrood Urological Society and French Urological Update Course, BMA, MPS, BAUS, LCA, Patient Safety Association as well as invited hospital talks and Aspen Group) and Irish Legal Society.

I have lectured on the Gough Square Clinical and Legal Update Seminar. I have received instructions from most of the Legal 500 Tier 1-3 ranked law firms in the Healthcare sector as well as the NHS litigation authority and ISCAS. I receive regular instructions from leading Irish Solicitors, the MDU, MPS and CPS and have attended GMC Hearings as an expert.

I am a member of the Medico-Legal section of the RSM. I am validated on The UK Expert Witness Register, The Academy of Experts and The Association of Forensic and Expert Witnesses. I am an Associate Member of APIL and a BAUS approved and trained medicolegal expert. I was voted Medical Negligence Expert Witness of the Year (2017 – 2025 by the legal press. I am insured by The Academy of Experts. I have completed the training for mediation run by the SOM (2021).

Most reports can be completed within 10-18 weeks of receipt of the documentation. Turnaround time can be discussed.
